Meeting spaces received modern touches and additional natural light. The previous Velvet Room dining area on the first level has been transformed into an event and meeting space. New lighting was added along with A/V equipment, making the room versatile for a multitude of programs. The redwood paneling remains while drapery was removed, exposing new walls in a light neutral color. Blackout shades were added to provide the correct light levels for screen presentations. The meeting rooms on the Mezzanine Level remain the same size but received all new lighting and ceilings. Cut-outs to the lobby below help engage the space with the rest of the hotel and provide even more light. The Fraser Event Space has a large conference table that can seat twenty-six. Meeting organizers have the option of dimming the room with motorized shades hidden in the ceiling when not taking advantage of the abundant natural light. The pre-function areas have finishes similar to the lobby, forming a bridge between the two spaces and encouraging mingling. Sonesta is committed to providing a safe and secure environment for our guests, visitors and employees. Working with our primary partner, Ecolab, we have created Stay Safe with Sonesta--a program that exceeds all CDC, WHO, and governmental requirements and recommendations. https://www.sonesta.com/staysafe
